PROFESSIONAL EXPERIENCE

Software Engineer at [W.J. Beitler](#)

June 2025 - Present

- Developed frontend interfaces in .NET MAUI, implementing responsive XAML pages and UI components.
- Integrated custom libraries to construct application functionality
- Utilized SQL Management Studio to log, query, and track operational data
- Built automated batch file tools to streamline ADB device connections for the team
- Debugged scripts and applied standardized testing methods to improve reliability
- Refactored legacy Web API controller classes to align with code-generation-based architecture

Teaching Assistant at [Carnegie Mellon University](#) and [Chatham University](#)

2022 - 2024

- Full time teaching assistant for a joint program funded and managed by Frank-Ratchye Studio for Creative Inquiry and Carnegie Mellon University's
- Extended Reality Technology Center Coached students to deliver novel 3d modeling tools using the Clayze package, real-sense cameras, looking glass, Arduinos, and Meta Quests
- Assisted with faculty research, digitization of historical artifacts from the Olkes collection

SELECTED PROJECTS

Haptic Alarm System for Healthcare Settings

2025 - 2026

- Developed and programmed software and housing using industry standard tools.
- Made pinout diagrams for wiring.
- Designed and constructed mechanical components.
- Built a SQL database that stored and utilized valuable data.
- Used multiple programming languages to make wifi connected, microcontroller based, standalone devices.
- Used Microsoft's .NET framework to host middleware, and user sign in pages.
- Researched medical systems, safety guidelines, sanitation standards, and developed to meet the needs of the design space.

EDUCATION

Chatham University

2022 - 2026

- Deans List
- Full Tuition Scholarship
- Coursework Highlights:
 - Programming for Immersive Experiences
 - Prototyping for Advanced Systems
 - Major: Immersive Media

TECHNICAL SKILLS

AI/LLM: Ollama local LLMs, Google ML OCR, YoloV8 Computer vision, Claude Code, Codex, VS Code

Coding: C#, Python, Javascript, C++, XAML

IDE's: JetBrains Rider, VS26,

Hardware: Meta Quest, Looking Glass, PC, Microcontrollers

3D Softwares: Blender, Maya, ZBrush, Fusion360

Audio: Audacity, Ableton, FL Studios, Reaper

Visual Development: Adobe Suite, GIMP

SDLC: Github, Microsoft Teams, Jira
