

OBADIAH BERNSTEIN

CREATIVE TECHNOLOGIST

CONTACT

✉ obadiah.bernstein@chatham.edu

🌐 obadiah.dev

📍 Pittsburgh, PA 15217

SKILLS

3D Softwares: Blender, Cinema4D, Maya, ZBrush, Houdini

Game Design Engines: Unity, Unreal Engine

Coding: C#, Python, Javascript, C++, Various IDE's (Rider), Creative Coding

Hardware: Meta Quest, Looking Glass, PC, Tilt 5

Audio: Audacity, Abelton, FL Studios

Visual Development: A.Illustrator, A.InDesign, A.Photoshop, A.Lightroom, A.Premiere, A.Fresco, A.Painter, DaVinci Resolve

Project Management: Plastic, Git, Github, Microsoft Teams, Monday, Jira

EDUCATION

Chatham University
Pittsburgh PA

Bachelors of Arts
Immersive Media
2022-2026

WORK EXPERIENCE

Teaching Assistant

**Carnegie Mellon University and Chatham University
Joint Program**

2022-2024

- Full time teaching assistant for a joint program funded and managed by Frank-Ratchye Studio for Creative Inquiry and Carnegie Mellon University's
- Extended Reality Technology Center Coached students to deliver novel 3d modeling tools using the Clayze package, real-sense cameras, looking glass, Arduinos, and Meta Quests
- Assisted with faculty research, digitization of historical artifacts from the Olkes collection

.NET MAUI Developer - IT Analyst

W.J.BeitlerCo.

2025-Current

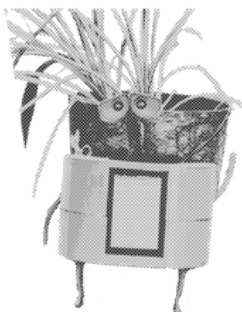

- Developed frontend interfaces in .NET MAUI, implementing responsive XAML pages and UI components.
- Integrated custom libraries to construct application functionality
- Utilized SQL Management Studio to log, query, and track operational data
- Built automated batch file tools to streamline ADB device connections for the team
- Debugged scripts and applied standardized testing methods to improve reliability
- Refactored legacy Web API controller classes to align with code-generation-based architecture

PROJECTS

Haptic Alarm System (Thesis)

- Developed and programmed software and housing using industry standard tools.
- Made pinout diagrams for wiring.
- Designed and constructed mechanical components.
- Built SQL database that stored and utilized valuable data.
- Used multiple programming languages to make wifi connected, microcontroller based, standalone devices.
- Used Microsoft's .NET framework to host middleware, and user sign in pages.
- Researched medical systems, safety guidelines, sanitation standards, and developed to meet the needs of the design space.

PROFILE

My name is Obadiah Bernstein. I create digital technology projects that immerse users in fun and creative technical spaces. I am a graduate of Chatham University. I majored in Immersive Media, which allowed me opportunities to develop software and learn development processes and programming languages. I worked for Chatham's Information Technology Department, and in Chatham's Immersive Media department as a Studio Assistant, where I developed and built robots, created and ran workshops for labs, and conveyed complex information to beginner-level programmers. My experiences as a student and employee in the Immersive Media department expanded my abilities as an independent designer and artist. I love multimedia art, from sewing to 3D modeling.
